Live Radio is a software tool developed in order to help individuals listen to their favorite Indian radio channel. The interface is highly intuitive and therefore allows all types of people easily find their way around it without facing issues, be them experienced or not. Aside from that, it is very simple, as it only contains two playback controls, namely play and stop, and the channels you can choose from. "What you see is what you get" is an expression that can be used in order to accurately describe this utility. The built-in list of stations is quite small, as it only contains 10 Indian channels, including City Radio 24/7, Radio Nimbooda, Desi Radio and Shakti 97.5 FM. This is considered to be a drawback, as there are not too many options available for users. So as not to become un-obtrusive, this program can be sent to the system tray, by simply clicking the "Minimize" button. Another setback is the fact that Live Radio does not integrate a volume control bar. The only way you can turn the music up or down is from the Windows Volume Mixer. There are no Help contents provided, yet seeing how easy it is to use this app, it becomes apparent that they are not actually needed.
